Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (CG) and the experimental group (EG). The CG was exposed to a control environment (CE) and the EG was exposed to an experimental environment (EE). The EE was designed to simulate a real-world environment with various stimuli (e.g., visual, auditory, and olfactory) and tasks (e.g., navigation, decision-making, and communication). The subjects were exposed to the EE for a period of 10 days. The results of the experiment are shown in the table below.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.
